End the Illegal Puppy Trade

The demand for puppies is higher than ever. Sadly, many of these puppies are bred in filthy conditions with little or no veterinary care.

Unscrupulous breeders use **cute** pictures, covering up the inevitably **quick** decline in the puppy's health.

Within days of joining their new families, these puppies can get very sick, causing heartbreak and costly vet bills.

We must end the #CuteQuickSick cycle.

FOUR PAWS wants to transform the online pet trade by making the breeders who sell online **traceable**. To achieve this, our team has developed a Model Solution to help verify a seller's identity and allow authorities to trace illegal breeders.

How you can help

If you're looking for a new pet, consider adoption, or if buying make sure that you do your research.

If you've been a victim of the trade - report it now.

Animal Welfare.
Worldwide.

1. Mix together the soy sauce, maple syrup, liquid smoke and smoked paprika, and marinate the tempeh for 30 minutes.

2. Heat a frying pan, add the oil and fry the marinated tempeh strips on each side for 2 to 3 minutes, ensuring both sides are lightly browned with caramelized edges.

3. Whilst the tempeh is frying, mash/slice the avocado and toast the bread.

4. Spread a thick layer of avocado to the toast, then add the tempeh bacon on top and dig in!

5. Sprinkle some paprika or chilli flakes for that extra kick!

Why not try serving with a side of kimchi?
