

# HOMEMADE AIR FRESHENER

DO YOU THINK IT COULD SMELL A LITTLE FRESHER IN YOUR HOME?  
TRY A HOMEMADE AIR FRESHENER!

## What you need:

- Dried flowers or herbs, coffee, spices ...
- Baking soda powder
- A screw-top jar or similar container
- Air-permeable fabric (preferably thinner than ours in the picture) or a lid that you can poke holes in
- Thread

## What you do

We used lavender, it smells so nicely. Fill half of the jar

1.

2.

Baking soda neutralises odours. Fill the jar and mix it with the lavender.

Cut the fabric into a circle and tie it to the jar with the thread.

3.

Now it is ready to be put somewhere - maybe next to shoes or in the wardrobe.

Shake it from time to time.

By the way, lavender repels moths.

Have fun with it!
